

Hi, my name is Davinderpal Singh. It's was in September of 2012 when I felt unusual due to sudden weakness, pains and huge loss of appetite. Because of the work I kept on ignoring the fact that I was actually seriously ill. One fine day I decided to finally visit Forties Hospital as I was aware about their excellent services in serious matters. With a regular check up I came to know that I am in critical condition. The team at forties did not delay the respective matter and immediately recommended me to Dr Gill. Dr. Gill immediately suggested me for dialysis. As the process of the dialysis was painful at first, Dr. Ranjan suggested me to go for "fistula" which relived me of pain and made the dialysis much more acceptable. This also helped to prevent further damage to me body. The next step was consultation about the whole process. Nurse Saravjeet conducted the consultation and I would say this had been the main supporting pillar in my operation. She had calmly and in detail had held me to prepare psychologically for the next main step and that was the transplant operation.

Last but not the least, the final and the most important step of the transplant was conducted by the very best, an expert surgeon Dr. Priyadarshi Ranjan. Dr.Ranjan from the very first day have been personally taking care of every aspect of my treatment. The whole process, do's and dont's, support and every other minor to major help have been provided by Dr. Ranjan. I never doubted the success of the operation that was to be conducted with such expert hands, all I was nervous was about the precautions I had to take post operation. With an successful operation behind our back, Dr. Ranjan specifically guided me the rules I had to follow that will make the operation a real success.

Today I am happy to say that I am on the progressive elevation to recovery and still Dr. Ranjan is kind enough to be there as a support any time I need it. He has been generous enough to give me his personal number and has always been there for me. I will highly appreciate Nurse Saravjeet and DR RANJAN who have taken my case so personally and helped me out of the critical situation. I thank them whole of my life for giving me new life...
